Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Applicant's election without traverse of Group 1, species A in the reply filed on August 6, 2004 is acknowledged.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bell (6,431,628).

Bell discloses a mobile pizza kitchen in a pickup truck. At column 1, lines 43-48, a typical pizza delivery is described as utilizing par-baked crust. When an order is placed, the cook assembles the pizza on a par-baked crust. Then the pizza is packaged for delivery. At column 3, lines 37-40 the concept of using two pizza pans for preparing pizza in a mobile vehicle is shown. At column 4, lines 58-68, the use of a Flashbake oven is disclosed for cooking par-baked crust. This oven is disclosed to produce both ultraviolet and infrared radiation to cook the pizza. At column 10, lines 6-25, the pizza assembly process is disclosed. First the pizza is precoated with sauce and a layer of cheese. Then the toppings are added and the pizza is cooked. Claim 1 appears to differ from the reference in the

recitation of the number of pizzas that can be cooked in the oven at one time. It would have been obvious to one having ordinary skill in the art to modify the oven size of Bell to provide for more than one pizza in the oven. Also it would have been obvious to one having ordinary skill in the art to utilize more than one rack in the oven of Bell in order to cook the pizza faster. This would allow the cook to serve more than one person who is waiting in line to purchase the pizzas. Further it would have been obvious to utilize different toppings on the various Bell pizzas in order to provide variations in the taste of the pizza.
